In addition to the events listed above, there are various events happening in departments including in-person and virtual interactions with employers, colleges and universities. There are links made across the curricula to highlight where the world of work fits with subject content. We also have a Level 6 qualified Careers Adviser, Hayley Arthur, who works with our year 10 and 11 students on a 1:1 and small group basis. We are also developing leadership opportunities across all year groups to enable our students to take on some responsibility and build their employability skills. Our Student Leadership team are enjoying developing their Events Management skills at school events such as Open Evening and Parent Information Evening.
